

BX PRO

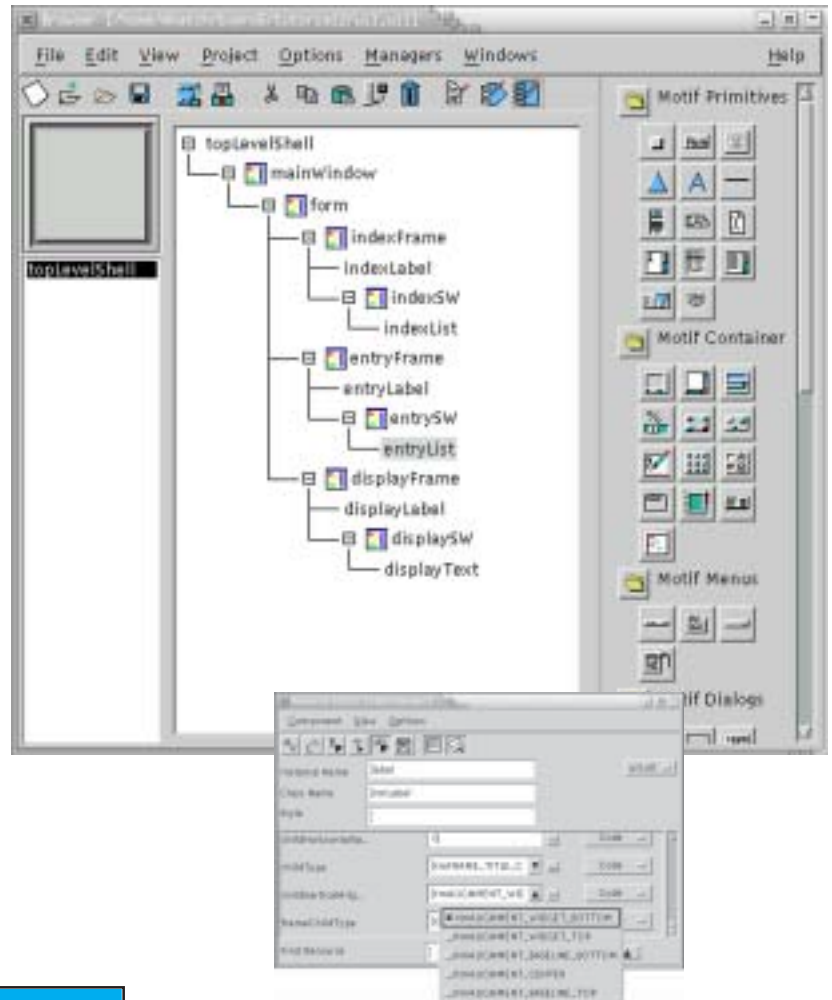

The Professional GUI Builder for Linux and UNIX

New Version 6.0: More Powerful Than Ever and Even Easier to Use!

Builder Xcessory PRO™ (BX PRO) provides C, C++ or Java developers with everything they need to develop and manage GUI projects of any size from start to finish.

Key Features

- New!** **Supports Motif 2.1!** With Motif 2.2 support available at no extra charge soon, you have the most current and powerful tools available to get your job done right.
- New!** **Includes ViewKit 2.1!** Integrated C++ object reuse framework with over 95 C++ components provides a jumpstart on your GUI development.
- New!** **Extensive support for open source development tools!** Autoconf, CVS, and Nedit support will speed your development without requiring the purchase of proprietary tools.
- Visual interface** speeds and simplifies development of Motif or Java GUIs.
- On-the-fly subclassing** makes creation of reusable components quick and simple.
- Styles** provide the ability to define, enforce and implement consistent corporate look-and-feel guidelines.
- Changes to generated code are preserved** facilitating support of special application requirements.

Benefits

- Speed GUI development**
- Eliminate unmaintainable code**
- Quickly implement changes**

Evaluations

ICS offers free 30 day evaluations on all our software.

To get an evaluation copy, navigate to <http://www.ics.com/getbxpro/>

Alternatively, you can request your evaluation copy by sending email to info@ics.com or by calling 1.617.621.0060

Platforms Supported

BX PRO runs natively on all major UNIX systems and is available for all popular commercial Intel x86 based distributions of Linux. Finally, a version is also available for OpenVMS systems running on the AXP architecture.

Java-based applications developed with BX PRO can run on any system that supports the Java platform. BX PRO supports the AWT Java toolkit, the GUI toolkit of choice for embedded or real time systems where performance and memory footprint are key requirements.

About Integrated Computer Solutions

MotifZone

To help developers, ICS maintains the MotifZone (<http://www.motifzone.net>) where you can find one of the largest collections of news, tutorials FAQs, and software links available anywhere! Motif experts, at ICS and worldwide, monitor the spam-proof community bulletin boards. Post a question at any time of the day or night and you'll be surprised at the speed with which you will get a helpful answer.

Founded in 1987

Integrated Computer Solutions, Inc. provides visual development tools for professional developers that promote rapid application development and software reuse. ICS is also the worldwide leader in Java and X/Motif training and provides quality technical support and consulting services.

Awards & Praise

Open Magazine

"Builder Xcessory from ICS is a GUI builder of extraordinary capabilities. The tool is practical and useful for building real-life code for production systems. It will teach people how to build applications and empower the more adventurous to withdraw from the humdrum and focus on the specific, to any depth they care to dig."

The Linux Journal

Awarded BX PRO their prestigious Editor's Choice award for "...essentially the first Visual C/C++ equivalent for Linux."

InfoWorld

"Organizations with mission-critical applications requirements that span UNIX, Windows, and the Web will find BX PRO to be a valuable solution."

Southwest Airlines

Used BX PRO to build their new flight scheduling system. They commented: "We would not have made our aggressive schedule had we not had Builder Xcessory to get us there."

Goddard Space Flight Center

Goddard used BX PRO for development of ground systems for the Hubble Space Telescope. They estimated BX PRO provided a total project savings of 25%. Furthermore they found: "...after working on BX for awhile, developers generally become more intuitive programmers and therefore they tend to write better code."
