

BX For JAVA™

The COMPLETE interface development tool for BUILDING mission-critical Java applications.

Now, creating intuitive, powerful, and robust AWT or Swing Java applications is as fast and easy as point-and-click!

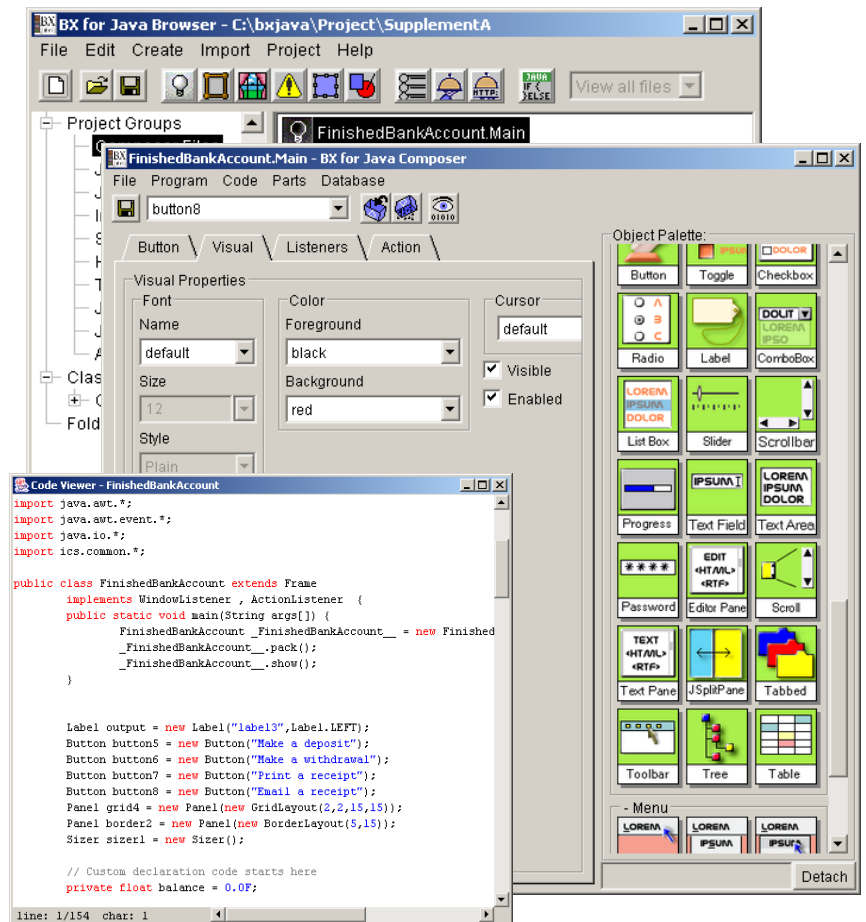

Watch your application come to life as BX's built-in Java interpreter updates your model instantly! Quickly build the best cross-platform user interfaces and complete applications with the confidence that comes from testing its functionality every step of the way!

Key Features:

- Drag-and-drop visual creation of even the most complex GUIs.
- Full support for all AWT, Swing/JFC components and all LayoutManagers.
- Full JavaBeans™ support including creation of your own of graphical JavaBeans.
- Java Wizards to help effortlessly produce large blocks of code for over 50,000 statements and functions.
- Real-time execution of your working model lets you try out your interface on-the-fly.
- "Pluggable Look and Feel" lets you see your Swing application as it will look when deployed on any platform.
- Full ODBC and JDBC support with visual mapping to GUI objects and comprehensive SQL wizards.
- Built-in Remote Testing Module enables automatic deployment of your application to an unlimited number of test stations.
- Built-in editor with method lookup and code completion via introspection, search and replace using Perl 5 regular expressions, color syntax highlighting, and unlimited undo/redo.
- Cross-platform debugger.
- Integrate with your choice of Java editors, debuggers, and compilers.

Benefits:

- Easy, fast, accurate creation of even the most complex GUI-intensive applications.
- The only tool you need to develop, test, deploy, and maintain pure Java applications.

Evaluations:

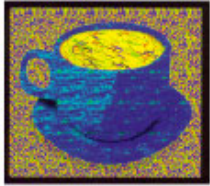

ICS offers a free 15-day evaluation of BX for Java. Download yours today at <http://www.ics.com/getbxjava>

Alternatively, you can request your evaluation copy by sending email to info@ics.com or by calling 1.617.621.0060

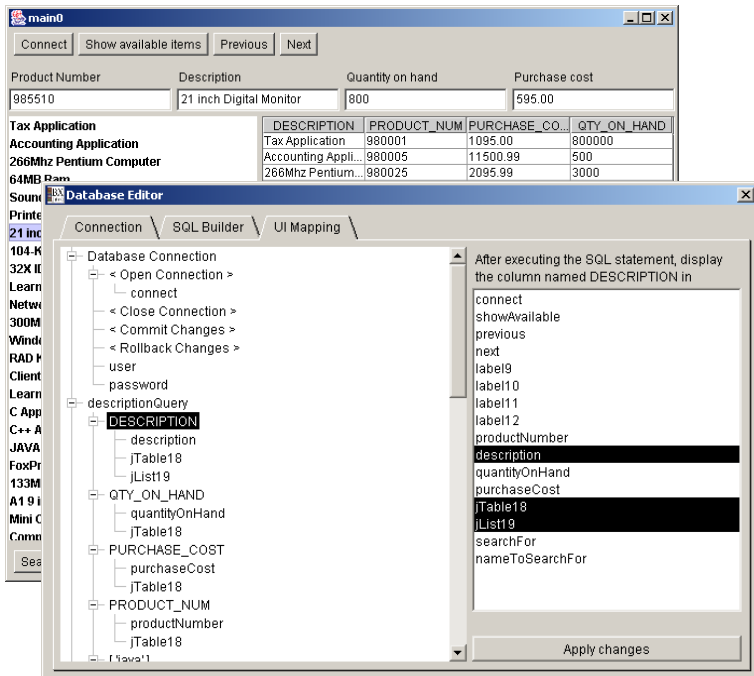

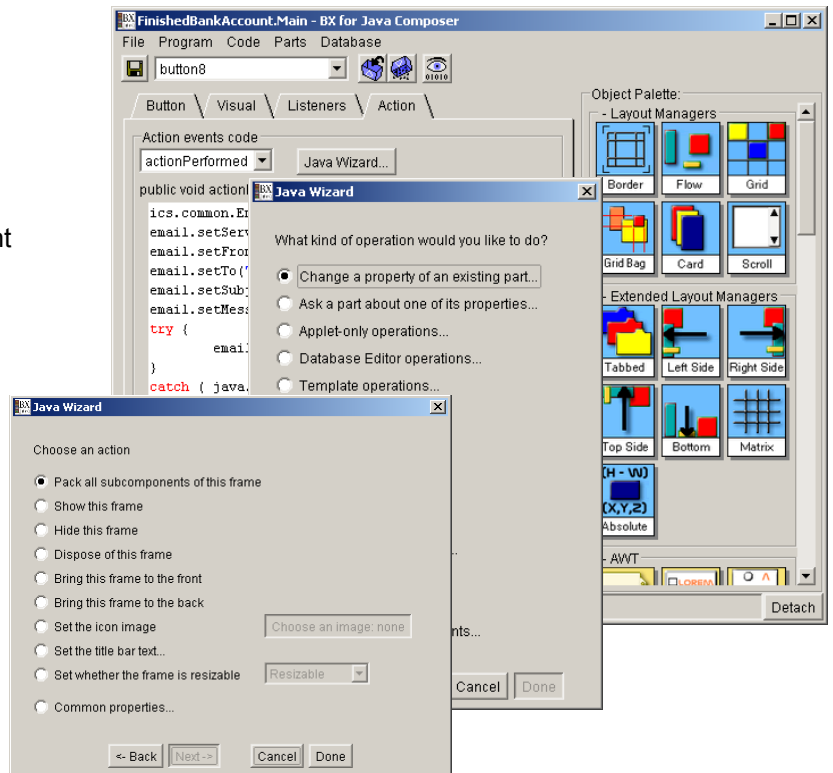

The User Interface Company.™

**Integrated Computer
Solutions Incorporated**

BX's comprehensive Java wizards help speed development by asking simple, relevant questions and then composing the Java code.

BX for Java even includes an intuitive graphical method of integrating data from any JDBC/ODBC data source. Using the Database Editor, you can visually select tables, choose which columns to display and which rows to include without writing a single line of SQL. With a click of the mouse, every SQL statement is integrated seamlessly into your interface. Need some help? Let the comprehensive SQL Wizard guide you along.

About ICS:

Founded in 1987, Integrated Computer Solutions, Inc. provides visual user interface tools for professional developers that promote rapid application development and software reuse using open standards. ICS is the worldwide leader in X/Motif training and the preferred Qt training provider for North America. ICS also provides industry-leading technical support, custom widget development, and consulting services.

System Requirements:

BX for Java runs on all major UNIX, Linux, and Windows systems running JDK versions 1.1, 1.2, 1.3, or 1.4 (recommended).

≥ 20 Mb free disk space for program

≥ 32 Mb RAM

≥ 800 x 600 pixel display
