Microsoft
GOLD CERTIFIED
Partner

FLEXnet InstallShield allows you to create powerful and flexible installations quickly and easily across all Windows operating systems.

First-time developers find it easy to create installations, while power users find its depth and flexibility perfect for developing complex software installations.

Keeps You Current with Latest Technologies and Standards

- FLEXnet InstallShield supports Microsoft's latest tools—including Visual Studio 2005, .NET 2.0 Compact Framework, Windows Installers (MSI), Internet Information Services (IIS 6.0), SQL Server 2005, and much more
- Easily expand installations to servers and Web services, including Microsoft SQL Server, Oracle, MySQL and IIS installation projects.

Decreases Your Development Time

FLEXnet InstallShield 12 Windows gives software producers of all sizes the ability to author the highest-quality Windows installations.

- Create Windows Installer, InstallScript, server and mobile device installations easily, while simplifying product documentation and testing requirements
- Enable application developers to capture, track, test and use installation requirements throughout the development process with FLEXnet InstallShield Collaboration—5-pack license included with Premier

FLEXnet InstallShield 12 Windows – Top 10

- Keep your Windows installations current with support for latest technologies and standards
- “Get ready for Vista”
- Quality: more than 250 customer-driven improvements
- InstallScript Engine Overhaul
- Available in German, English, Japanese

FLEXnet InstallShield 12 Windows: Installation Creation Process

Improves Your End-User's Experience
