

JClass® DesktopViews

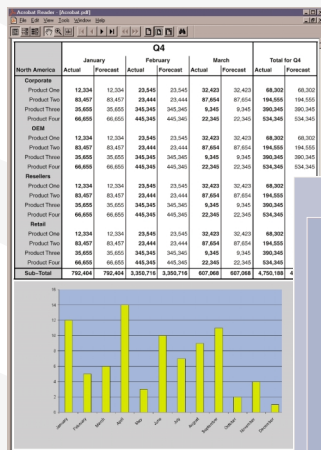

THE ONLY JAVA CLIENT COMPONENTS YOU NEED

- Build better applications in less time with fewer resources
- Increase the quality of your entire application with fully integrated components
- Take advantage of integration with the latest JDKs and IDEs
- Focus on development related to business logic instead of infrastructure
- Leverage best of breed examples, demos, support and documentation to get going quickly

JClass DesktopViews is an award-winning collection of integrated Java components that helps developers to build enterprise-class applications on the client side quickly and cost effectively. Pre-built, pre-tested and of professional quality, they accelerate development and improve the quality of your code.

JClass DesktopViews provides a range of high-value GUI functionality including 2D and 3D charting, tables and grids, layout and reporting, GUI enhancements, JAR optimization, hierarchical data display, data connectivity as well as data input and validation.

With superior components, unrivaled JDK, platform and IDE support and one year of premium technical support plus free upgrades, JClass DesktopViews includes everything a professional Java developer needs to build client-side applications with rich interface requirements.

JClass® DesktopViews

THE ONLY JAVA CLIENT COMPONENTS YOU NEED

Integrated Development Environments
